

BAT Kenya Scoops Six Awards at the 19th Energy Management Awards 2023

Our sustained track record of excellence in environmental management has yet again received external recognition. We are absolutely delighted to announce that BAT Kenya bagged six awards during the 19th Energy Management Awards (EMA) held recently, organised by the Kenya Manufacturers Association.

Our Green Leaf Threshing Plant in Thika emerged **Overall runners up** in Energy Management, winner in the **Sustained High Performance** and **Water Efficiency categories** and **runners up in Renewable Energy**. Our manufacturing factory at Nairobi's Likoni road emerged **winner in Renewable Energy** (large consumers) and **runners up in Thermal Savings**.

The EMAs, seek to promote excellence in energy management by recognising companies that are at the forefront of driving energy efficiency as part of enhancing efforts towards sustainable business.

As BAT accelerates its transformation, sustainability is front and center in everything we do. This is anchored on our purpose to reduce the health impact of our business as a focus area, and as important, is driving excellence in environmental management, delivering a positive social impact and ensuring robust corporate governance across the business.
